

VANTAGE 17-35 MM ZOOM

EXTREMELY COMPACT
AND LIGHTWEIGHT
SUPER CLOSE FOCUS TO
THE FRONT ELEMENT

The Vantage 17-35 mm/T2.8 Zoom can focus up to 28 cm / 11" – closer than any other zoom lens available. It can focus even closer than comparable close focus prime lenses. Shots in focus just in front of the clip-on matte box are possible.

Image quality is excellent. All optics are made by Nikon, maintaining maximum definition even in the corners at close focus.

The lens is compact and lightweight ideal for handheld or Steadicam shots. All scales are geared and clearly engraved on both sides. The front diameter is 110 mm - similar to the Vantage Macro Lenses and to the Cooke S4 Primes.

Inspiration comes in a small package with the Vantage 17-35 mm Lightweight Zoom.

Optical design	13 elements / 10 groups
Weight	1.7 kg / 3.75 lbs
Front diameter	110 mm
Overall length	127 mm
