# HAWK65 – LARGE FORMAT ANAMORPHICS

Hawk has created the first new 65 mm anamorphic glass in over fifty years. Hawk65 anamorphic lenses are specifically designed for increased sensor sizes that have renewed interest in the premier 65 mm format.

Cinematographer Markus Förderer, BVK

(Independence Day: Resurgence) on the lenses:

“The Hawk65 anamorphic lenses offer a truly unique aesthetic. They combine an unparalleled high-quality anamorphic look with the right balance of a clean image rendition and organic texture. The 1.3x anamorphic squeeze elevates large format sensors to their highest level. The new coating technology with it’s soft natural contrast creates amazing skin tones and makes the Hawk65 lenses a perfect companion for digital sensors.”

These lenses give cinematographers the opportunity to shoot anamorphic with modern glass made for the 65 mm and full frame camera technologies of today and tomorrow.
