

# VANTAGE SLIDE DIOPTERS

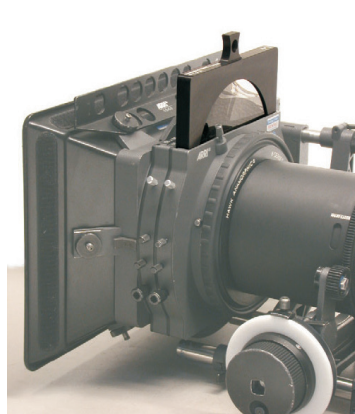

Vantage Slide Diopters are designed for use with regular Arri MB-14 or LMB-4 matte boxes.

Vantage Slide Diopters fit directly into the filter slots of these matte boxes. Therefore, placing a diopter in front of the lens takes only a few seconds. Up to three Slide Diopters can be used at the same time. To insert a Slide Diopter, two of the original filter holders must be removed.

Lenses such as the Zeiss 10 or 12 Ultra Prime or the Hawk V-Series 30, 35, or 40 mm can be used with a diopter for the first time by simply placing a Vantage Slide Diopter into an Arri LMB-4 clip-on matte box.

Vantage Slide Diopters are made with high-quality optical elements that are set within precision machined and engraved aluminum frames.

A set contains three Diopters  
optical power: +0.5, +1, +2  
diopter dimension: 6"  
frame dimension: 6.6x6.6"  
widest lens Zeiss: 10mm Ultra Prime  
widest anamorphic lens:  
Hawk V-Series 25 mm
