

VANTAGE SQUEEZE DIOPTERS

Vantage Squeeze Diopters are designed for use with an ARRI MB-14 matte box.

They add a subtle out-of-focus touch to the edges of the frame. Zooming "through" the Vantage Squeeze Diopter creates a unique in-shot variation of the soft effect.

The achieved effect is similar to the well-known Clairmont Squishy Lens™.

Vantage Squeeze Diopter
with 25mm neutral zone

Vantage Squeeze Diopter
with 75mm neutral zone
